

# **Exact<sup>TM</sup> SL ComVac Oils** Food Grade Synthetic Compressor/Vacuum Pump Oils

## About Exact<sup>™</sup> SL ComVac Oils

**Exact<sup>™</sup> SL ComVac Oils** are premium quality lubricants engineered with the highest quality components to offer prolonged service life under the most severe operating conditions. **Exact<sup>™</sup>** SL **ComVac Oils** conform to international food standards. All components meet or exceed FDA regulation 21 CFR 178.3570. **Exact<sup>™</sup> SL ComVac Oils** are **NSF H1** registered and are authorized by the **Canadian Food Inspection Agency** as safe for incidental food contact. All viscosity grades are specifically formulated to operate in wet or dry food processing environments, prevent oxidative breakdown and extend equipment life. **Exact<sup>™</sup> SL ComVac Oils** are compounded to assure excellent protection against wear, foam and rust.

#### Applications

#### Exact<sup>™</sup> SL ComVac Oils is best suited for:

- Food processing and some pharmaceutical areas
- Rotary screw compressors
- Airline lubrication
- Vacuum pumps
- Rotary vane compressors
- Reciprocating compressors

## **Available Packaging**

These products are available in pails (19L/5 US Gal), drums (208L/55 US Gal), and bulk (1250L/330 US Gal) containers.

Discover the exact advantage www.exactspecialty.com

# **Exact<sup>TM</sup> SL ComVac Oils** Food Grade Synthetic Compressor/Vacuum Pump Oils

## **Performance Benefits**

**Exact<sup>™</sup> SL ComVac** Oils provide the following benefits:

- Elastomer and seal material compatibility
- Resist oxidative breakdown to provide sludge-free systems, longer fluid life, and decreased downtime
- Provide a safeguard against rust and corrosion in most environments
- Protects your equipment and metal parts with anti-wear technology for use in tough operating conditions

## **Technically Speaking**

| ISO Viscosity Grade     | 32     | 46     | 68     | 100    |
|-------------------------|--------|--------|--------|--------|
| NSF Registration Number | 139148 | 139149 | 139150 | 139151 |
| Product Code            | E6005  | E6010  | E6015  | E6000  |
| Viscosity, cSt @ 40°C   | 32     | 46     | 68     | 100    |
| Viscosity, cSt @ 100°C  | 5.4    | 6.7    | 9      | 11.5   |
| Viscosity, SUS @ 100°F  | 158    | 220    | 340    | 480    |
| Viscosity, SUS @ 210°F  | 44     | 47     | 55     | 63     |
| Viscosity Index         | 102    | 97     | 106    | 102    |
| Flash Point, °C (COC)   | 207    | > 220  | > 220  | > 240  |
| Flash Point, °F (COC)   | 405    | > 460  | > 460  | > 460  |
| Pour Point, °C/°F       | -15/5  | -15/5  | -15/5  | -15/5  |
| Rust, Dist. Water       | Pass   | Pass   | Pass   | Pass   |
| Specific Gravity, g/ml  | 0.83   | 0.84   | 0.84   | 0.84   |
| Density, lbs./US Gal    | 6.93   | 7.01   | 7.01   | 7.01   |
|                         |        |        |        |        |

These are typical figures and do not constitute a specification.

## Handling and Safety Information

For information on the safe handling and use of this product, refer to its **Material Safety Data Sheet** (MSDS), obtainable from **www.exactspecialty.com** 

## SECTION 1: Product Information and Company Identification

| Common Name<br>Product Code | Exact™ SL ComVac Oils<br>E6000, E6005, E6010, E6015 |
|-----------------------------|---|
| Material Use                | Food Grade Synthetic Compressor/Vacuum Pump         |
|                             | Oils  |
| Manufacturer                | Commonwealth Oil Corporation                        |
|                             | 2080 Ferriss Rd. N., Harrow ON.                     |
|                             | NOR 1G0   |
| In Case of Emergency        | CANUTEC (613) 996-6666, collect 24 hours            |
|                             |   |

### **SECTION 2: Composition and Information on Ingredients**

ComponentCAS Registry #OSHA PELACGIH TVLConcentration, %This material is classified as not hazardous under OSHA regulations in the United States,<br/>the WHMIS in Canada and NOM-018-STPS-2000 in Mexico

See SECTION 8 for Exposure Limits and SECTION 11 for Toxicological Data

### **SECTION 3: Hazards Information**

| Chemical Family<br>Physical State<br>Emergency Overview  | <ul> <li>Petroleum Hydrocarbon</li> <li>Liquid</li> <li>No specific hazard</li> <li>Use with care</li> </ul>   |
|--|--|
| Routes of Entry<br>Potential Acute Health Effects<br>Medical Conditions Aggravated By Overexposure<br>Overexposure Signs and Symptoms<br>See SECTION 11 for Toxicological Data | <ul> <li>Follow good industrial hygiene practices</li> <li>Dermal, eye contact, inhalation and ingestion</li> <li>None known</li> <li>None known</li> <li>Not available</li> </ul>   |
| SECTION 4: First Aid Measures  |  |
| JECTIVITE T. TIIST AIU MICASUICS   |  |
| Eye Contact  | <ul> <li>Check for and remove any contact lenses. In<br/>case of contact, flush eyes with plenty of<br/>water for at least 20 minutes. Cold water may<br/>be used. Get medical attention should<br/>irritation persist.</li> </ul> |
| Skin Contact   | <ul> <li>Remove any contaminated clothing. Wash<br/>with soap and water. Get medical attention<br/>should irritation persist.</li> </ul>   |
| Inhalation   | <ul> <li>If inhaled, remove to fresh air. If not<br/>breathing, give artificial respiration. If<br/>breathing is difficult, give oxygen. Get<br/>medical attention.</li> </ul>   |

| Ingestion   | <ul> <li>Do not induce vomiting unless directed to do<br/>so by medical personnel. Never give anything<br/>by mouth to an unconscious patient. Should<br/>large amounts be swallowed, call a physician.</li> </ul>   |
|---|--|
| Note to Physician   | <ul> <li>Not available</li> </ul>  |
| SECTION 5: Fire Fighting Measures   |  |
| Flammability  | <ul> <li>Low hazard - combustible or burns at</li> </ul>   |
| Auto-Ignition Temperature<br>Flash Point (COC)<br>Flammable Limits<br>Hazardous Combustion Products | <ul> <li>temperatures above flash point</li> <li>Not established</li> <li>&gt; 200°C (&gt; 392°F)</li> <li>Not established</li> <li>Products are smoke, carbon monoxide, carbon dioxide, and trace oxides of sulfur</li> </ul>   |
| Fire Hazard in Presence of Various Substances   | <ul> <li>Flammable in presence of open flames, spark,</li> </ul>   |
| Explosion Hazard in Presence of Various<br>Substances   | or static discharge at or above flash point <ul> <li>Risk in Presence of Mechanical Impact: Not available</li> <li>Risk in Presence of Static Discharge: Not</li> </ul>  |
| Fire Fighting Media and Instructions  | available <ul> <li>Small Fire: Use dry chemical powder</li> <li>Large Fire: Use water spray, fog, or foam. Do not use water jet.</li> </ul>  |
| Protective Clothing (Fire)  | <ul> <li>Fire fighters should wear positive pressure<br/>self-contained breathing apparatus (SCBA) and<br/>full turnout gear. Be sure to use MSHA/NIOSH<br/>approved respirator or equivalent</li> </ul>   |
| Special Remarks on Fire Hazards   | <ul> <li>Do not use force stream as this could cause<br/>the fire to spread.</li> <li>SCBA should be worn by fire fighters</li> </ul>  |
| SECTION 6: Accidental Release Measures  |  |
| Small Spill and Leak  | <ul> <li>Absorb with an inert material and put spilled</li> </ul>  |
| Large Spill and Leak  | <ul> <li>material into appropriate waste disposal</li> <li>Absorb with an inert material and put spilled material into appropriate waste disposal</li> <li>Do not allow any potentially contaminated water, including rain water, runoff from fire fighting or spills, to enter ay waterway, sewer or drain</li> </ul> |
| See SECTION 8 for Personal Protective E   | guipment and SECTION 13 for Waste Disposal   |

See SECTION 8 for Personal Protective Equipment and SECTION 13 for Waste Disposal

| SECTION 7: Handling and Storage |  |
|---------------------------------|--|
| Handling                        | <ul> <li>Proper grounding procedures should be used<br/>as static charge may accumulate.</li> <li>Avoid breathing vapors or spray mists.</li> <li>Avoid contact with eyes, skin and clothing.</li> <li>Always wash your hands after handling.</li> <li>Do not cut, weld, heat or pressurize empty<br/>containers.</li> </ul> |
| Storage                         | Keep containers tightly closed.  |
| www.exactspecialty.com          | 4  |

- Store in dry, cool, and ventilated areas.
- Do not cut, weld, heat or pressurize empty containers
- Do not store near open flames or sources of ignition

#### **SECTION 8: Exposure Controls and Personal Protection**

| Personal Protection         |  |
|-----------------------------|--|
| Eyes                        | <ul> <li>Safety glasses or goggles are advisable</li> </ul>  |
| Body                        | <ul> <li>Lab coat or suitable protective clothing are<br/>advisable</li> </ul>                           |
| Respiratory                 | <ul> <li>Not required under normal and intended usage<br/>conditions</li> </ul>                          |
| Hands                       | <ul> <li>Chemical resistant or oil impervious gloves are<br/>advisable</li> </ul>                        |
| Feet                        | Shoes (as required by work place)  |
| Protection for Large Spills | <ul> <li>Splash goggles, full suit, vapor respirator, boots,<br/>chemical resistant gloves</li> </ul>    |
|                             | <ul> <li>Self contained breathing apparatus should be used<br/>to avoid inhalation of product</li> </ul> |

#### **Engineering Controls**

- Good ventilation should be sufficient to control airborne levels
- Local exhaust is recommended to control emissions at the source
- Mechanical ventilation should be used for confined areas
- Eyewash stations and safety showers should be proximal to the workstation

#### **Exposure Limits**

ACGIH TLV (US and Canada)

#### **Oil Mist - Severely Refined**

- TLV-TWA: 5mg/m<sup>3</sup>
- Form: Mist

Consult your local authorities for your acceptable exposure limits

#### **SECTION 9: Physical and Chemical Properties**

| Physical State             | Liquid   |
|----------------------------|--|
| Appearance and Colour      | <ul> <li>Clear, colourless solution</li> </ul> |
| Odour                      | Petroleum                                      |
| pH                         | N/A  |
| Flash Point (COC)          | > 200°C (> 392°F)                              |
| Boiling/Condensation Point | <ul> <li>Not available</li> </ul>              |
| Pour Point                 | <ul> <li>-15°C (5°F)</li> </ul>                |
| Freezing Point             | <ul> <li>Not available</li> </ul>              |
| Specific Gravity           | 0.83 – 0.84 g/mL (Water = 1g/mL)               |
| Density                    | 6.93 – 7.01 lbs./US Gal                        |
| Vapor Pressure             | < 1 mm Hg @ 20°C (68°F)                        |
